ADITYA COLLEGE OF ENGINEERING AND TECHNOLOGY
No 2/9, Kamakshipura, Hesaraghatta Hobli, Yelahanka, Bengaluru- 560089
Affiliated to VTU, Belagavi | Approved by UGC/AICTE/Govt. of Karnataka, Bengaluru

Course:	**INNOVATION and DESIGN THINKING**	Course Code	**BIDTK258**
Semester / Section		Date	**28-05-2025**
Name of the Student:		USN	

Assignment- 01

Note: 1. Use the black ballpoint pen to bubble the correct option.

2. Darken the bubbles completely without leaving any gaps

Ex: DO'S DON'T

A ~~A~~

B **B**

C ~~C~~

D **D**

Total Marks

with Faculty Signature

Module-01

PROCESS OF DESIGN -Understanding Design thinking

1. Design Thinking is:
   - A. Thinking about design
   - B. Designing ways in which people think
   - C. Asking users to solve problems
   - D. Defining, framing and solving problems from users' perspectives

2. Iterative Prototyping helps designers
   - A. refine ideas
   - B. discover previously unknown issues and opportunities
   - C. Both of above
   - D. None of the above

3. Design Thinking typically helps in _____
   - A. Innovation
   - B. Data analytics
   - C. Financial planning
   - D. Operational efficiency

4. Qualities of Design Thinking leaders are
   - A. Views self as product
   - B. Prototypes visions
   - C. Collaborates and communicates
   - D. All of the above.

5. What are the steps of Design Thinking Process?
   - A. Understand > Draw > Ideate > Create > Test
   - B. Empathize > Define > Ideate > Prototype > Test
   - C. Empathize > Design > Implement > Produce > Test
   - D. Understand > Define > Ideate > Produce > Test

6. Innovation and Culture involves
   - A. Design thinking and Practice
   - B. National, Corporate and Disciplinary culture
   - C. Social and Institutional Environment
   - D. All of the above

7. Design Thinking focuses on major issues
   - A. Prototypical conflicts
   - B. Analyze design projects
   - C. Coevolve
   - D. None of the above

8. Ethnographic research approach enables
   - A. Idea generation
   - B. Prototyping
   - C. Sketching
   - D. All of the above

9. You can interview your target users at any step of

the Design Thinking approach.

A. True
B. False

10. Ambiguous media affords
A. Parametric adjustments
B. Paradigmatic shifts
C. Understanding and changes in relationship
D. None of these

11. A _____model traditionally employs electronic media in the form of complex computer-generated flow charts.
A. Business Product
B. Business Prototype
C. Business Process
D. None of these

12. MVP investigates
A. Iterating multiple times
B. No time constraints
C. Time constraints are not tight
D. None of the above

13. Who or what is at the center of the design thinking model?
A. Concept of innovation
B. Customer
C. Company
D. Product

14. Design Thinking is sometimes visualized as a linear process, but it is actually
A. Impactful
B. Incapacitating
C. Intellectual
D. Iterative

15. Media model categorizes media according to
A. Levels of resolution
B. Levels of abstraction
C. Both of these
D. None of these

16. A Design Thinking approach should start with
A. Conducting a benchmark against competitors
B. Understanding the problem to solve
C. Collecting a maximum of inspiring ideas to start working on D. A brainstorming session

17. A brainstorming session is
A. There is no rule, it's up to the brainstorming facilitator to decide
B. A mix of individual and collective activities
C. A collective activity only
D. An individual activity only

18. Which one of these statements is TRUE about the Prototype step?
A. Your prototype should be exactly like final product
B. The objective is to have people interacting with the product
C. You can consider anyone as potential user of product
D. None of the above

19. You are an Innovation Consultant helping a Team apply the Design Thinking approach. This team is working on the Ideation step and have produced more than 100 ideas. What would you suggest they do first?
A. To prototype some of the ideas
B. To categorize ideas
C. To continue iterating on ideas
D. To vote for preferred ideas

20. What is Design Thinking?
A. A Process used for creative problem-solving
B. A methodology developed by designers for designing
C. A framework to teach design
D. A method facilitated by user interface designers only

21. Which of these statements are practices of the Define step?
A. Propose as many solutions to the problem
B. Come up with a point of view statement highlighting user needs
C. Create how we ask questions
D. None of the above

22. When testing a new prototype, how many people do you need to interview per Persona to detect the main usability issues?
A. One person per persona
B. Five people per persona
C. 10 people per persona
D. 20 people per persona

23. Which one of these statements is NOT a good interview practice for user testing in the Empathy step?
A. Encourage interviewees to share personal experience
B. Encourage interviewees to provide concise answers going straight to the point
C. Interview your target audience in their usage environment
D. Depending on interviewees, diverge from the interview guide to ask additional unplanned questions

24. Companies can learn to empathize with customers in design thinking through all of these options EXCEPT which?
A. Making assumptions
B. Focus groups
C. Questionnaires
D. Social Media

25. It is possible to have a very good User Interface (UI) and very bad User Experience (UX).
A. True

B. False

26. The objective of a low-fidelity prototype is to
    A. Test fast and fail cheap
    B. Validate final concepts among your audience
    C. Test more concepts only at later stage
    D. Evaluate production costs

27. One needs to have professional training in design to become a design thinker. True or False?
    A. True
    B. False

28. Design Thinking tackles complex problems by _____
    A. Testing
    B. Designing
    C. Defining
    D. Empathizing

29. The Design Thinking process is iterative, flexible and focused on collaboration between _____and _____
    A. Design and empathize
    B. Designers and users
    C. Empathize and test
    D. None of the above

30. Design is nonlinear process
    A. True
    B. False

Module-02

Tools for Design Thinking

1. What happens in the test stage of design thinking?
    A. You conduct a written test of your design team.
    B. You allow consumers to test a product or service.
    C. You engage in internal testing with employees.
    D. You test products designed by competitors.

2. Which of the following principles are not considered for design thinking?
    A. Embrace Experimentation
    B. Human-centric design
    C. Profit-centric
    D. Pattern identification for problem solving

3. To empathize, one has to
    A. Observe
    B. Engage
    C. Listen
    D. All of the above

4. Which of the following are NOT tools of visualization?
    A. Maps
    B. Images
    C. Stories
    D. Videos

5. _____storytelling is the most compelling type of story
    A. Aural
    B. Visual
    C. Textual
    D. All of the above

6. Collecting _____is an important portion of testing a prototype in the test stage of design thinking.
    A. Pictures
    B. Money
    C. Feedback
    D. Emails

7. Mind maps are used to ideas
    A. Generate
    B. Visualize
    C. Structure
    D. All of the above

8. Journey mapping is also called mapping
    A. Path
    B. Experience
    C. Conduct
    D. Feedback

9. Which of the following are NOT tools of Design Thinking?
    A. Co-creation
    B. Prototyping
    C. Mind Mapping
    D. Online Marketing

10. Which of these are NOT components of a mind map?
    A. Branches
    B. Arrows
    C. Central Idea
    D. All of the above are components

11. Journey mapping maps which phase of activity of service for a customer?
    A. Before a service
    B. During a service
    C. After a service
    D. All of the above

12. _____is used with the objective of identifying needs that customers are often unable to articulate.
    A. Mind mapping
    B. Experience mapping
    C. Story telling
    D. Rapid Concept Development

13. Value chain analysis examines how an organization interacts with value chain partners to _____

new offerings.

A. Produce
B. Market
C. Distribute
D. All of the above

14. A prototype is a simple experimental model of a proposed solution used to
    A. Test ideas
    B. Validate ideas
    C. Both
    D. None of the above

15. A hypothesis is,
    A. A wished-for result that the researcher concludes the research
    B. A complicated set of sentences that pulls variables into proposed complex relationships
    C. A conjecture that is grounded in support back ground originating from secondary research
    D. None of the above

16. Learning launches are designed to test the key underlying value-generating assumptions of a potential new- growth initiative in the market place.
    A. True
    B. False

17. What is your first model/design of a product called?
    A. Draft
    B. Rough Draft
    C. Prototype
    D. Practice Design

18. _____is an analysis of persons, groups, events, decisions, periods, policies, institutions or other systems that are studied holistically by one or more methods?
    A. Literature Study
    B. Case Study
    C. Co-creation
    D. Prototyping

19. Collaborative teamwork is essential in design thinking for
    A. Equal Importance to all members
    B. Solving multifaceted problems
    C. Unbiased Selection of ideas
    D. Better failure management

20. Design Thinking is best suited to addressing problems at the intersection of
    A. Business and society
    B. Logic and emotion
    C. Human needs and economic demands
    D. All of the above

21. Tools for design thinking are
    A. Visualization
    B. Journey Mapping
    C. Mind Mapping
    D. All of the above

22. _____refers to any activity that takes information beyond text and numbers and into images, maps, and stories.
    A. Visualization
    B. Journey Mapping
    C. Mind Mapping
    D. Prototyping

23. _____is an ethnographic research method that focuses on tracing the customer's "journey" as he or she interacts with an organization while in the process of receiving a service, with special attention to emotional highs and lows.
    A. Visualization
    B. Journey Mapping
    C. Mind Mapping
    D. Prototyping

24. _____examines how an organization interacts with value chain partners to produce, market, and distribute new offerings.
    A. Visualization
    B. Journey Mapping
    C. Value Chain Analysis
    D. Prototyping

25. _____is used to represent how ideas or other items are linked to a central idea and to each other.
    A. Visualization
    B. Journey Mapping
    C. Value Chain Analysis
    D. Mind Mapping

26. _____is a tool for using the insights and design criteria generated to develop new business opportunities?
    A. Visualization
    B. Journey Mapping
    C. Value Chain Analysis
    D. Rapid Concept Development

27. _____is a tool for bringing to the surface the key assumptions underlying the attractiveness of a new business concept and using available data to assess the likelihood that these assumptions are true?
    A. Visualization
    B. Assumption Testing
    C. Value Chain Analysis
    D. Rapid Concept Development

28. _____is based on the belief that the users' presence is essential in the creative process, as the users provide insight into what is valuable to them.

A. Prototype
B. Assumption Testing
C. Co Creation
D. Rapid Concept Development

29. _____are designed to test the key underlying value-generating assumptions of a potential new-growth initiative in the marketplace.

A. Prototype
B. Learning Launches
C. Co Creation
D. Rapid Concept Development

30. _____is a simple experimental model of a proposed solution used to test or validate ideas, design assumptions and other aspects of its conceptualization quickly and cheaply, so that the designer/s involved can make appropriate refinements or possible changes in direction.

A. Prototype
B. Learning Launches
C. Co Creation
D. Rapid Concept Development.
